REDEFINE MINING

Minocular is an integrated automation service that is redefining mining intelligence & the overall work mechanism. The Mining industry in India has some pain problems which need to be sorted so as to attain maximum benefits with the inputs applied. Minocular is all about providing solutions that are based on future driven technology.

Use of Intelligent Systems, data driven prediction analysis, aerial survey & mapping are all the latest terms in contrast when it comes to bring about a change in the scenario of how mining industries operates. Automated processes don't depend on human attention to fetch detail or knowledge of operations in order to use machinery effectively. Thus our vision is to upgrade the use of technology & take it to the next level.

We help our clients with solutions that are Real-time. Most important aspect in the Mining Industry is fetching Real-time solutions & taking appropriate actions according to it. When it comes to meet the growth in global market, companies should embrace automated solutions. We are trying to redefine the process of automation in mining industry in order to cater greater efficiency, safer conditions and higher profits.

OUR PRODUCTS
MINOCULAR SUITE OF APPLICATIONS

01	**MinoDrone**	For Aerial Survey and Mapping
02	**MinoCommand**	Managing on ground mining operations
03	**MinoAlert**	Smart Safety alert and critical alert system
04	**MinoWatch**	The centralized Dashboard for mines

05	**MinoDrill**	For managing the drilling operations
06	**MinoGarage**	For streamlining the maintenance
07	**MinoTerminal**	Smart Customized Mobile Data Terminals
08	**MinoManage**	The MIS system for reporting & analytics
09	**MinoBlast**	For carrying out the blasting activity
10	**MinoEye**	For surveillance and safety
11	**MinoEnvision**	Smart Machine Learning and Big Data Engine
12	**MinoCompliance**	For managing the compliance of a mine
13	**MinoFleet**	Automating and managing the fleet
